Subject: RFQ 27057-A: Kiwanis Park Barrier Netting
Addendum #1

Gentlemen/Ladies:

Below, please find responses to questions, clarifications, and additional information for the above-referenced Request for Quote. This information shall be considered when preparing your quote.

1. **Net heights: What netting height does the County want for each section (the Field #5 and #6 backstops and third-base lines)? How tall are the existing poles above grade?**

   The new netting should replace the existing nets at the same height on the existing poles. Contractor shall determine/verify and supply the required dimensions, materials, hardware, and configuration of all components. Sizes must be verified by the vendor prior to submitting the quote. Specifications for the proposed components shall be included with the vendor's quote.

2. **Poles: How many poles are in each run, and roughly how far apart are they? Do you maybe have a layout or photos you can share?**

   Contractor shall determine/verify and supply the required dimensions, materials, hardware, and configuration of all components. Sizes must be verified by the vendor prior to submitting the quote. Specifications for the proposed components shall be included with the vendor's quote.

3. **Cables: Are there existing top and bottom cables that can be reused, or should we include new cables and hardware in our price?**

   The existing top and bottom cables can be reused.

4. **Removal scope: Page 7 says to remove the existing netting along the third-base line, and page 8 says the third-base line and backstop. Should we include removing and disposing of the backstop netting on both fields as well?**

   Existing netting shall be removed and properly disposed of the netting on both fields 5 and 6.

5. **Netting material: Will the County accept an equal netting that meets the 1-3/4" mesh, black UV-treated, 295 lb break strength requirements in place of the Enduro Hybrid brand? If so, we will list it on the Exceptions sheet and include spec sheets with our quote.**

Alternative products may be considered provided they are clearly identified, meet all minimum specifications of the RFQ, and are listed on the Exceptions to Specifications sheet with supporting product data. The County will determine the equality and acceptability of any proposed alternative. See General Terms and Conditions #8, Brand Name, and #10, Responder Substitutions.

6. **Field measurements: Our office is in Arizona and Florida, and we do installations nationwide. While, I don't happen to have a sales rep in the area at the moment, would the County accept site photos and pole heights/spacing from your staff in place of an in-person measurement before the quote? We would still do a full field measurement before fabrication if needed upon award.**

   Contractor shall determine/verify and supply the required dimensions, materials, hardware, and configuration of all components. Sizes must be verified by the vendor prior to submitting the quote. Specifications for the proposed components shall be included with the vendor's quote.

7. **Please confirm when vendors can access Fields #5 and #6 to measure the existing pole spans and netting heights, and whether advance coordination or an appointment is required.**

   No appointment is required. Vendors are welcome to visit the park anytime Monday through Sunday from sunrise to sunset to obtain measurements. Please be aware there could be baseball games or practices taking place at night and on the weekends.

8. **Please confirm whether an installation subcontractor may be included under the responder's quote, with the required insurance and references.**

   Yes, an installation subcontractor may be included under the respondent's quote. Any subcontractor utilized for services must carry the insurance coverage required by the specifications and provide references demonstrating successful completion of similar work. The respondent will remain responsible for the performance of the subcontractor and must ensure that all subcontractors' requirements and contract provisions are fully satisfied. The respondent shall also be solely responsible for compensating the subcontractor for all services performed under the contract, and Fayette County shall have no obligation to make direct payments to any subcontractor.

9. **Does this revised RFQ require any bid bond, performance/payment bonds, or mandatory pre-quote meeting? None appears on the new RFQ checklist.**

   No. A bid bond, performance/payment bonds, and a mandatory pre-quote meeting are not required for this revised RFQ.

10. **May Coldsteel purchase custom-fabricated net panels and attachment hardware from a supplier while performing installation with its own crew?**

    Yes, a respondent may purchase materials from a supplier and perform the installation with its own crew. The respondent shall be responsible for making sure all materials are correct and ensuring compliance with all contract requirements and ensuring compliance with all contract requirements, specifications and warranties. The

respondent shall also be solely responsible for all payments to supplies and oany other parties engaged in the performance of the contract. Fayette County shall have no obligation to make direct payments to any supplier.

11. **Can bidders inspect and measure existing panels/poles at the park without an appointment, or should a site visit be scheduled? Is any prequote site meeting mandatory?**
    No appointment is required. Vendors are welcome to visit the park anytime Monday through Sunday from sunrise to sunset to obtain measurements. Please be aware there could be baseball games or practices taking place at night and on the weekends. There will not be a prequote site meeting.

12. **What are the approximate net heights and pole spacing for each field? Do all existing top/bottom cables remain, or should replacements be included?**

    Contractor shall determine/verify and supply the required dimensions, materials, hardware, and configuration of all components. Sizes must be verified by the vendor prior to submitting the quote. Specifications for the proposed components shall be included with the vendor's quote. The existing top and bottom cables can be reused.

13. **Please confirm whether any bid bond or performance/payment bond is required. We did not see a bond requirement in the 15-page RFQ.**

    No. Bid bonds and performance/payment bonds are not required for this revised RFQ.

14. **May a contractor use three completed residential fencing projects as references for similar installation work, or must the three projects specifically involve ballfield barrier netting?**

    All three required references shall include projects involving ballfield barrier netting.

15. **Does the County require a specific professional license beyond applicable Georgia business registration for replacement netting on the existing poles?**

    No. The County does not require a specific professional license beyond applicable Georgia business registration for the replacement netting work described in this RFQ.

Received by (Name):_____ Company_____

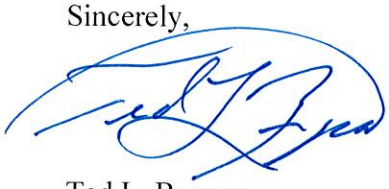

Note: If this addendum is not returned to the Fayette County Purchasing Department, or if it is returned unsigned, responding individuals, companies, or other organizations will still be responsible for the requirements of this addendum and the specifications or changes herein.

The due date for this RFQ **remains unchanged**. Quotes will be accepted until **3:00 p.m. on Monday, November 16, 2026**. Quotes must be received via email to Tamia Carnell, Buyer & Contract Coordinator, at tcarnell@fayettecountyga.gov or via fax to (770) 719-5534 at or before the due date.

Questions regarding this solicitation will be accepted until **2:00 p.m. on Monday, November 9, 2026**. After that time, the County will not be able to respond to inquiries regarding this project.

For administrative matters or questions about the procurement process, please contact Tamia Carnell, Buyer & Contract Coordinator at (770) 305-5150 or email at tcarnell@fayettecountyga.gov.

Sincerely,

Ted L. Burgess
Director of Purchasing
